NATURAL STONE VENEER

Heading

If you are the one who likes to decorate the house with stone work. Go for a wide and cool of some decorative stones, such as marble, granite or onyx. However, stone and tiles are high price. In addition, the installation fee for hire a contractor is not cheap. It is difficult and the stone tiles cannot be fixed. Must secure the attached stone condition. You will have some very expensive items to offer. If it is a stone, then it is produced by rock breaking process. It is a heavy weight. If you are interested, it is a wide choice.

Difference between Natural real stone vs. natural stone veneer

Natural Stone Veneer is produced with natural stone surface. But through various processes, up to the thickness, down to the weight, 2 millimeters, which makes it very lightweight. As a result, it is easy to install without the need for a concrete structure or a steel structure to support it. It is naturally safe. Stone veneer is produced by the type and color, with the total installation cost about 2.000 - 10.000 bath or more per square meter and does not include structure costs that must be designed to support the actual weight of the stone which is the approximate price of natural stone veneer.

Who are our customers?

Our clients range from resorts, hotels, large buildings to the decoration of restaurants, cafe, coffee shops, music rooms, car washing spaces and residential home furnishings. Generally, wherever you can see that we can support every kind of customer, we have got you all over the country to support the expansion of the product.

Stone Veneer

Stone veneer is a real stone surface, with 10-12 mm, suitable for all types of walls. It is a durable material and can be used both inside and outside. Natural stone veneer.

Artificial Marble Slab

Artificial marble slab is a synthetic material. The surface is finished with UV for a glossy stone, known as high gloss artificial marble. The surface is glossy, durable, lightweight.
